

Process Change Notification

Dec-31-2017

Title: MCC Will Use Glass Passivated Chip For RL10X and RL20X Series Rectifiers

PCN#: 123117-2

Planned Effective Date :Apr-1-2018

Reliability Data: Available per individual request

Samples contact: Sales@mccsemi.com

For question concerning this notification: techsupport@mccsemi.com

Notification Type:

Final Process/Product Change Notification(FPCN)

MCC will consider this change approved unless specific conditions of acceptance are provided in writing within 30 days of receipt of this notice. To do so, contact techsupport@mccsemi.com

Description and purpose :

To be more environment friendly and provide more robust parts to our customers, MCC will use glass passivated chip (GPP) to replace OJ chip (Open Junction) for RL10X and RL20X series rectifiers. GPP structure is more reliable and has better performances than OJ structure, internal qualification process had been finished and the report is available by individual request. To identify the parts with GPP chip inside, MCC will assign new line code on body (see next page for details).

For any concern about this PCN, please feel free to contact your local sales representative or us directly via above E-mail address.

Qualification Data and Summary:

Devices were selected with 1000V voltage rating.

Qualification Test Result:

Test	Condition	Interval	Results
HTRB	Tj=150°C, 80% Vr,	1000 Hrs	0/77
OP	Ta=25°C, Rated If,	1000 Hrs	0/77
PCT	Ta=121°C, 100%RH, 15psig	96 Hrs	0/77
TC	-55°C~+150°C	1000 Cycles	0/77
Resistance to solder heat	260°C for 10s		0/10
Solderability	245°C for 5s		0/10
